

FOR DACC USE ONLY

Concept No:

Men of African Descent and Carcinoma of the Prostate (MADCaP)**Analysis Concept Form**

Please provide the following information on the analyses you wish to perform, and then upload through the MADCAP website. This will be reviewed by the Data Access Coordination Committee (DACC). The DACC will help to identify overlaps, suggest potential merges and organize proposals so that they can be presented to the PIs. After review by the DACC, concept forms will be placed on the website for review by PIs. ***PIs will then be given a month to opt out of any particular proposals, although the general expectation is that the most studies will participate in most analysis.***

Primary data for approved concepts will be sent to the relevant investigators only, once DTAs have been signed. There is no such requirement for summary data. **

Date:

Title of Proposed Project:

Is this an amendment?

Yes ☐ No ☐

If yes, provide original Concept Number:

Contact Investigator:

Institution:

Contact E-mail(s):

Member of MADCAP:

Yes ☐ No ☐MADCAP Study Acronym(s)
for the Contact
Investigator(s):

Names (and institutions) of all investigators who will receive the primary data**	
Members of the Writing Group:	
Other Investigator Institutions:	

Concept Description: *Please provide a concise description of Background/Aims*

Primary Endpoint *(please check box):*

- | | | |
|----------------------------------|--------------------------|----------|
| Prostate cancer risk | <input type="checkbox"/> | |
| Prostate Cancer Subtype or Group | <input type="checkbox"/> | Specify: |
| Prostate Cancer Survival | <input type="checkbox"/> | |
| Other | <input type="checkbox"/> | Specify: |

A. GENOTYPE/BIOMARKER DATA REQUESTED

Data Being Requested <i>(please check box):</i>	
Summary data	<input type="checkbox"/>
Raw data*	<input type="checkbox"/>
Data from subset of studies*	<input type="checkbox"/> Specify:

* DTA will be required

Genotype/Biomarker Data:

*Either: attach a specific list of SNPs and biomarkers (if short) **or** provide sufficient information for the data centre to define the genes and SNPs (for example, those proposed by your group, those in a specific chromosomal interval).*

B. PHENOTYPE DATA REQUESTED

Note: The core phenotypic data* will be sent as standard.

Date requested from:

Cases ☐

Controls ☐

Data from Specific Centers ☐ Specify:

Variables from Extended Risk Factor Data Dictionary:

Variables from Pathology Data Dictionary:

Variables from Survival or Treatment Data Dictionary:

C. ADDITIONAL INFORMATION

Analysis Plan:

Budgetary considerations, if applicable:

Writing Committee:

Time Plan:

Any other considerations you would like the DACC to be aware of:

** Information about variables in the MADCAP database and data dictionary may be found on the website (XXXXX) within the member section. Please do not request 'all' the risk factor, pathology or survival data without very solid justification because such approval is unlikely to be given.*
